To Our Patients and Friends:

It is with a heavy heart that we have temporarily closed Port Jefferson Dermatology as a result of the COVID-19 pandemic. Given the rapid spread of Coronavirus, we have decided to heed the request of Governor Cuomo and do our part to protect our patients, our staff, and the larger community. We have scheduled a closure starting now and continuing until further notice. We will update you going forward via our website www.portjeffersondermatology.com.

Rest assured we will be available for urgent issues and emergencies. There will be a staff member at each office during business hours if you need to reach us and our pager numbers are on the answering service. Also, a physician will be on call to help you if something arises.

This coming Monday (3/23/2020), we will be deploying a teledermatology platform if you need medical attention. Our staff can help you in that regard and you can communicate with our physicians via a live webcam link. If, however, you require in-person care for a true emergency, we ask that you not go to an emergency room and risk further spread of Coronavirus. We can arrange to meet you in the office with appropriate personal protective equipment to address your acute needs.

We ask that you be patient during this unprecedented national crisis. Routine prescription refills, billing issues, and similar non-emergent matters are best addressed when we are back up and running. We hope that will be soon but we are monitoring the situation as you are and we are trying to protect the safety of our staff and the community.

Stay safe, wash your hands, and we will hopefully all see each other soon whether it be in the office or at a local restaurant. Be well.

The Physicians and Staff of Port Jefferson Dermatology
